28 Repair/Replacement For Cracked Weld On Old Style Side Output Muffler

We are addressing the issue with the old style side output muffler cracking. Once the crack has started water will fill the engine and eventually cause a hydro lock in the cylinder.

We suggest checking these mufflers when they come into the yard. They can be cracked on the inside by the lifting nut, or on the outside where the large white circle is. If it is cracked it can be welded, if there is excessive damage replace it with a new style muffler.

See the below image for reference of an old style side muffler. If the mount is like the one circled in red it is the old model that will crack.

APE HEADQUARTERS

7032 S 196TH STREET
KENT, WA 98032
(800) 248-8498 • (253) 872-0141
